

Module 1

Intro to Programming

Input-Output, Variables, Data Types

Conditional Statements (if-else, switch)

Loops (for, while), Basic Programs

Object-Oriented Programming

Classes & Objects

Constructors and Destructors

Inheritance (Single, Multi-level, Multiple)

Polymorphism (Compile-time, Runtime)

Encapsulation and Abstraction

Real-Life Applications of OOPs

Software Engineering

SDLC Phases (Waterfall vs Agile)

Requirements, Design, Testing, Maintenance

Agile Practices (Scrum, Sprints, Backlog)

Version Control (Git, GitHub Basics)

Module 2

1. Basics + Arrays & Strings
2. Time and Space Complexity (Big O)
3. Arrays: Operations, Insertion, Deletion, Search
4. Sorting (Bubble, Selection, Insertion)
5. Strings: Manipulation, String Matching Algorithms
6. Linked Lists, Stacks, Queues
7. Singly and Doubly Linked Lists
8. Stack Operations + Applications (Balancing Symbols, Reverse)
9. Queue, Circular Queue, Deque
10. Implementation via Arrays and Linked Lists
11. Trees & Graphs
12. Binary Trees & Tree Traversals (In, Pre, Post)
13. Binary Search Tree (BST): Insert, Delete, Search
14. Graph Representations: Adjacency List & Matrix
15. BFS and DFS Traversals
16. Tree/Graph-based Interview Questions
17. Recursion & Backtracking
18. Recursion: Basics and Practice (Factorial, Fibonacci)
19. Backtracking: N-Queens, Rat in Maze, Subsets1
20. Searching, Sorting, Hashing
21. Linear and Binary Search
22. Advanced Sorting (Merge Sort, Quick Sort)
23. Hash Tables & Hash Maps (Collisions, Implementation)

Module 3

DBMS

ER Diagrams, Keys (Primary, Foreign, Candidate)

Normalization (1NF to 3NF)

SQL Basics: SELECT, INSERT, UPDATE, DELETE

Joins (INNER, LEFT, RIGHT), Aggregations

Transactions, ACID Properties, Indexing

Operating Systems

Process vs Thread, Scheduling Algorithms (FCFS, SJF, Round Robin)

Memory Management (Paging, Segmentation)

Deadlock Detection & Prevention

CPU & I/O Management Overview

Computer Networks

OSI and TCP/IP Models

IP Addressing (IPv4), Subnetting

DNS, DHCP, HTTP/HTTPS

TCP vs UDP, Network Devices (Router, Switch)

Module 4

Quantitative Aptitude

- Number Systems (HCF, LCM, Divisibility)
- Percentages, Ratios & Proportion
- Profit & Loss, Simple & Compound Interest
- Time, Work & Wages, Time-Speed-Distance
- Averages, Mixtures & Allegations
- Permutations & Combinations
- Probability & Basic Statistics

Logical Reasoning

- Coding-Decoding, Blood Relations
- Syllogisms, Statement–Conclusion
- Direction Sense, Puzzles, Seating Arrangement
- Series & Pattern Completion
- Critical Thinking and Assumptions
- Input-Output & Analytical Reasoning

Verbal Ability

- Reading Comprehension Techniques
- Grammar Rules, Error Spotting
- Sentence Correction, Active-Passive
- Synonyms, Antonyms, One Word Substitution
- Para Jumbles, Cloze Tests
- Vocabulary Building Strategies

Day-wise Plan (Tech + Aptitude)

Day	Technical Focus	Aptitude Focus
Day 1	Programming Basics (I/O, Loops, Conditionals)	Number Systems, HCF, LCM
Day 2	OOP Concepts (Class, Inheritance, Polymorphism)	Percentages, Ratios
Day 3	OOP (Encapsulation, Abstraction, Real-life Apps) + Git	Profit & Loss, SI & CI
Day 4	Arrays, Time/Space Complexity	Averages, Mixtures
Day 5	Strings + Sorting (Bubble, Insertion, Selection)	TSD, Time & Work
Day 6	Linked List (Singly, Doubly)	P&C, Probability
Day 7	Stack, Queue (Circular, Deque)	Blood Relations, Coding-Decoding
Day 8	Tree Traversals (Inorder, Pre, Post)	Syllogism, Statement-Conclusion
Day 9	BST (Insert, Delete, Search)	Direction, Series
Day 10	Graphs (Adj List/Matrix), BFS & DFS	Puzzles, Seating
Day 11	Recursion (Fib, Fact), Backtracking (N-Queens, Maze)	Analytical Reasoning, Input-Output
Day 12	Linear/Binary Search, Merge Sort	RC Techniques, Para Jumbles
Day 13	Quick Sort + Hash Tables/Maps	Grammar, Error Spotting
Day 14	DBMS: ERD, Keys, Normalization	Sentence Correction, Active-Passive
Day 15	SQL Queries + Joins + Aggregates	Antonyms, Synonyms, One-Word
Day 16	OS: Threads, Scheduling, Paging	Cloze Tests, Vocabulary Building
Day 17	OS: Deadlocks, CN: OSI Model, IP, TCP/UDP	Mock Test: Quant + Logical
Day 18	CN: Subnetting, DNS, DHCP	Mock Test: Verbal + Logic
Day 19	Full Revision (OOP, DSA, SQL)	Quick revision all aptitude topics
Day 20	Mock Test (Full Syllabus) + Final Review	Mock Test + Flashcard Review

How to Prepare for Cognizant 2025 in 5 Days? | Cognizant Preparation 2025 | Cognizant Exam | Round 1 (Communication Assessment)

Section	Assessment Area	No. of Questions	Task Description
Section A	Reading & Listening	23 Questions	Carefully read presented sentences.
Section B	Speaking	4 Questions	Speak on a specified topic for up to 1 minute.
Section C	Grammar	34 Questions	Answer questions related to grammar, including sentence corrections and transformations.
Section D	Comprehension	16 Questions	Choose the correct answer based on a recorded speech or passage.
Total	—	77 Questions	—

Time Allotted: 58 Minutes

Topic	Importance
Reading Comprehension ✓	4
Sentence Correction ✓	4
Sentence Completion ✓	4
Synonym Antonym ✓	4
Vocabulary	4
Error Spotting	3
Para Jumbles	2
Direct Indirect Speech	2
Active Passive Voice	2
Analogy	1
Sentence Selection	1
Article	1
Preposition	1
Tense	1
Subject Verb Agreement	1
Conjunction	1

Round 2 (Aptitude Assessment)

Aptitude assessment	
Duration: 80 minutes	2 sections
- Quantitative Aptitude - Analytical and Logical reasoning	

Logical Reasoning

Topic	Importance
Data Sufficiency	4
Coding Decoding	4
Directions	4
Pattern Recognition	4
Logical Deduction / Deductive Reasoning	3
Data Arrangement	3
Selection Decision Table	3
Logical Sequence of Words	3
Letter Series & Number Series	2
Puzzle	2
Data Interpretation	2
Syllogism	2

Topic	Importance
Seating Arrangement	1
Calendar	1
Clock	1
Blood Relation	1
Odd Man Out	1
Cubes & Dices	1
Visual / Spatial Reasoning	1
Inferred Meaning	1
Mathematical Orders	1
Venn Diagrams	1
Input Output	1

Quantitative Aptitude

Topic	Importance
Permutation & Combination	4
Probability	4
Profit & Loss	4
Speed Time & Distance	4
Number System	4
Divisibility Rules	3
LCM HCF	3
Surds and Indices	3
Simple & Compound Interest	3
Logarithm	3
Inverse	3

Topic	Importance
Mixture & Alligation	2
Percentages	2
Time & Work	2
Geometry & Mensuration	2
Ratio & Proportion	1
Average	1
Simplification	1
Problem on Ages	1
Algebra	1
Boats & Streams	1
Pipes & Cisterns	1
Equations	1
Functions	1

Gaming Aptitude (Sometimes)

1. Digit Challenge (6 minutes)
2. Motion Challenge (6 minutes)
3. GeoSudo Challenge / Deductive Logic Challenge (6 minutes)
4. Inductive Logic Challenge (6 minutes)
5. Oddo Challenge / Similarity Challenge (6 minutes)
6. Switch Challenge (9 minutes)
7. Grid Challenge (9 minutes)
8. Inductive Logic Category Table Challenge (6 minutes)

Round 2 (Technical Assessment)

- Skill Cluster 1 is the default cluster for technical assessment, and candidates will be evaluated on Java, ANSI SQL, HTML, CSS, JavaScript skills. Candidates can choose Skill Cluster 2 or Skill Cluster 3 or Not applicable as their additional skill cluster. Based on the preference of additional Skill Cluster, few candidates will be considered for Skill Cluster 2 or Skill Cluster 3 assessment which will be notified.
 - Skill Cluster 1: Java, ANSI SQL, HTML, CSS, JavaScript (85% questions will be on Java and ANSI SQL)
 - Skill Cluster 2: Python, ANSI SQL, Cloud fundamentals (85% questions will be on Python & ANSI SQL)
 - Skill Cluster 3: C#, ANSI SQL, HTML, CSS, JavaScript (85% questions will be for C# and ANSI SQL)
- Kindly note that final decision of mapping skill cluster for technical assessment is at the sole discretion of Cognizant. If you are selected, you should be flexible to learn any skill areas during training based on business demand.

Technical assessment – Cluster 1

Duration: 120 minutes

3 sections

Coding - Java Programming

Problem solving, Searching, Sorting, String handling, Arrays and Collections, Control flow statements, Working with date and time, Exception handling, Object Oriented Programming

Query - Database / ANSI SQL using MySQL

DDL, DML, DCL, TCL, Understanding constraints and their types, SQL Operators, SQL Functions, Clauses in SQL, Joins and their types, Sub-queries, Views and Indexes

Coding - Web UI

HTML, CSS & JavaScript

HTML

to Prepare for Cognizant 2025 in 5 Days? | Cognizant Preparation 2025 | Cognizant Exam

- Structure
- Section
- Header
- Footer
- Image
- Anchor
- Table
- Block and Inline Elements
- Forms

CSS

- Basics
- Style Application

JavaScript

- Event Handling

Technical assessment – Cluster 2

Duration: 120 minutes

3 sections

Coding - Python

Data Structures, Functions, Object-Oriented Programming (OOP), File Handling, Libraries and Modules, Exception Handling

Query - Database / ANSI SQL using MySQL

DDL, DML, DCL, TCL, Understanding Constraints and their Types, SQL Operators, SQL Functions, Clauses in SQL, Joins and their Types, Sub-queries, Views and Indexes

Cloud Fundamentals- Multiple Choice Questions (MCQ)

Introduction to Cloud Computing, Cloud Service Models, Cloud Deployment Models, Virtualization, Cloud Providers, Basic Cloud Services
